

Quality Policy

Our quality management system is aimed at our company implementing the best work practice to meet requirements of its clients and to ensure stable operation of the company's management system.

To fulfil our intentions in the area of quality management, we:

- are aware that a bold, persistent and open employee is our value;
- ensure that our introduced and maintained quality management system and our liabilities toward it are understood by our employees and implemented in their daily work;
- identify and comply with the binding external and internal regulatory requirements in the area of quality management;
- analyse our performance in the quality management area and manage risks to determine the areas needing improvements and to continuously perfect the quality management system;
- make sure that high-quality solutions are provided to customers, by working with material suppliers and other cooperation partners because one of the most important goal set for our activity is to have satisfied customers whose wishes are completely understood and fulfilled.
